

MILKIT

THINK SMART, MILK SMART

MILKLINE®

RENOVATE THE MILKING PARLOUR TO GET BACK TO ACHIEVING
MAXIMUM EFFICIENCY FOR MILKING
AND OPTIMIZE FARM PRODUCTION, QUICKLY AND WITH
A REDUCED INVESTMENT
NOW THAT SOLUTION IS POSSIBLE...WITH **MILKIT**

RENOVATING A TRADITIONAL MILKING PARLOUR IMPLIES:

- Long installation times for individual components
- Extended milking time due to part of the parlour being non-operational
- Animals must be redistributed across fewer milking points.

WITH MILKIT:

- Renovating the milking parlour is a simple and quick operation
- Suitable for new or existing milking parlours – recommended for herringbone, tandem and parallel without cabinet
- Installation times are significantly reduced, no masonry or carpentry work is required
- Cabinet comes complete with all components
- Plug & Play connectors
- The full milking system remains operational during renovation
- Existing milking units and cleaning systems can be adapted.

The heart of **MILKIT** is made up of the pre-assembled and pre-wired electronic and electromechanical milking equipment in a compact and sturdy stainless steel cabinet that guarantees simple and fast installation, maximum component protection and easy cleaning. The handy Plug & Play connectors allow quick and efficient milking point cabling. Not only that, but it was also designed and created to adapt to the existing structures.

START USING **MILKIT** AND YOU WILL REALIZE STRAIGHT AWAY THAT YOU HAVE NEVER BEFORE TRIED ANYTHING LIKE IT!

MAIN CHARACTERISTICS

Can be combined with the FFS30 milk sensor or the ICAR approved MEL1000 milk meter

Compatible with cSense™ Tag

Can be connected with Dataflow™ II Milking

Compact design ●
(W 300 x H 500 x D bottom part 180 mm)

Electronic double valve ●

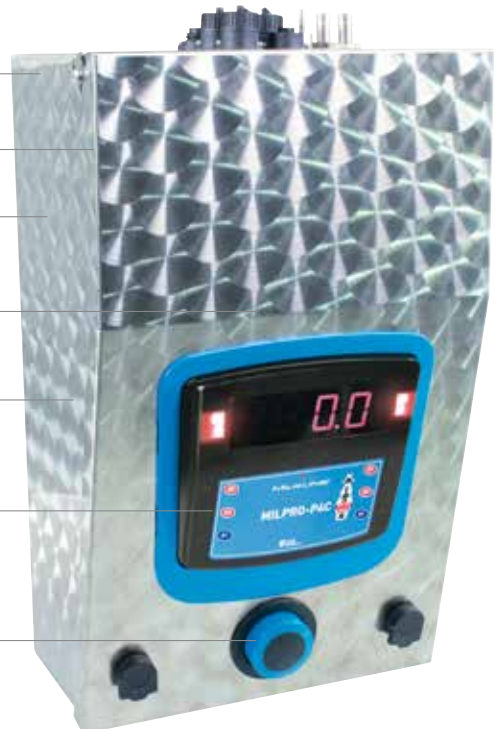

Vertical stainless steel cabinet ●

Controlled flow electronic pulsator ●

Piston for automatic cluster removal ●

ED200 or MILPROP4C control unit with display ●

Multifunction pushbutton ●

NEED HELP CHOOSING THE RIGHT SOLUTION?

No matter what you are looking for, whether it is a solution with an automatic disconnect or that displays the electrical conductivity per quarter, there is a **MILKIT** suited for your needs.

Low milk yield arrest (only with identification)	✓	✓	✓
Milking-stop function per quarter	✗	✗	✓
Milk electric conductivity of each quarter	✗	✗	✓
Signaling of quarter inflammation	✗	✗	✓

MILKIT can be installed as a stand-alone solution, without any connection with an external management software or fully integrated with DataFlow™ II, allowing you to manage and control your herd in the most complete way.

In any case, remember that a stand-alone system can be connected to DataFlow™ management software at any time, without modifying the installed components.

Feel free to choose your solution and reach your objectives in different steps.

DATAFLOW™ II HERD MANAGEMENT SOFTWARE

IS A COMPREHENSIVE, INTEGRATED SOLUTION FOR MILKING MANAGEMENT AND HERD MONITORING.

DataFlow™ II is a PC-based software that provides real-time information on various aspects of dairy farm management, including cow fertility, health, feed, milking, and milk yield. It offers advanced management tools like reports, graphs, and analyses to support effective decision-making.

The intuitive, customizable interface allows farmers to tailor the program to their specific needs.

DataFlow™ II is a modular system that enables farmers to select the features that best fit their farm's requirements.

DATAFLOW™ II MOBILE APP

With the DataFlow™ II App the farmer can consult animal data and specific reports and also enter new data and events.

Monitoring milking and milk yield

Selection gate

Walk through scale

Behaviour monitoring

Third-party software integration

Animals are identified using the cSense™ sensor, which is attached to a specially designed collar that stays properly positioned on the animal's neck without affecting their normal behavior.

DataFlow™ II
FUNCTIONS AVAILABLE

Why choose **MILKIT**

THE MOST INNOVATIVE PLUG & PLAY UPGRADE KIT FOR YOUR MILKING PARLOUR

A MORE EFFICIENT MILKING PROCESS
AND BETTER HEALTH CONDITIONS FOR
THE HERD

REDUCTION OF MILKING TIMES
THANKS TO VARIABLE PULSATION

PREVENTION OF THE
OVER-MILKING PHENOMENON

ICAR APPROVAL
(MILPROP4C AND MEL1000)

APPROVED

CONTROL OF THE MILKING OPERATIONS
IN REAL TIME AND FOR EACH
INDIVIDUAL ANIMAL
